Shepherd Center, in partnership with the Georgia Governor's Office of Highway Safety, has developed the first mobile app developed by certified driver rehabilitation specialists for parents to teach their teens to drive safely.

Studies have shown that one of the most protective factors against teenage injuries and fatalities due to car crashes are parents who model, monitor, and enforce safe driving practices.

AutoCoach is an innovative app designed for parents to teach their teens how to drive.

AutoCoach includes features that heavily support modeling safe driving behaviors for your teen.
